Part A – Coding Practice

Objective

In this challenge, we will learn some basic concepts of C that will get you started with the language. You will need to use the same syntax to read input and write output in many C challenges. As you work through these problems, review the code stubs to learn about reading from stdin and writing to stdout.

Task

This challenge requires you to print $Hello, World!$ on a single line, and then print the already provided input string to stdout. If you are not familiar with C, you may want to read about the printf() command.

Example

$s = \text{"Life is beautiful"}$

The required output is:

```
Hello, World!
Life is beautiful
```

Function Descriptio

Complete the main() function below.

The main() function has the following input:

- string s: a string

Prints

- *two strings: * "Hello, World!" on one line and the input string on the next line.

Input Format

There is one line of text, s.

Sample Input 0

Sample Input 0

```
Welcome to C programming.
```

Sample Output 0

```
Hello, World!
Welcome to C programming.
```

Change Theme Language: C

```c
#include <stdio.h>
#include <string.h>
#include <math.h>
#include <stdlib.h>

int main()
{
    char s[100]; // This creates a buffer to hold the input string

    // This reads the entire line of input from stdin
    // %[^\n] tells scanf to read everything until it hits a newline
    scanf("%[^\n]%*c", &s);

    // 1. Print Hello, World!
    printf("Hello, World!\n");

    // 2. Print the input string 's'
    printf("%s", s);

    return 0;
}
```

Line: 1 Col: 1

C language

You have earned 5.00 points!

You are now 10 points away from the 1st star for your c badge.

33% 5/15

Congratulations

You solved this challenge. Would you like to challenge your friends?

Compiler Message

Success

Input (stdin) Download

```
Welcome to C programming.
```

Expected Output Download

```
Hello, World!
Welcome to C programming.
```

Part B – Google Workspace Collaboration

Digital Literacy & Awareness Check

A quick check-up on our digital habits, security, and professional communication skills.

If a "free" app updates its terms to claim ownership of your uploaded projects, what is your safest move? *

- ◯ Ignore it; they can't legally own my work.
- ◯ Download my data and delete the account.
- ◯ Trust that "The Cloud" keeps it private anyway.

In your own words, explain the difference between **Digital Participation** and **Digital Literacy**. *

Long-answer text

Which of these is the **reddest** flag in an "Urgent Internship" email? *

- professional-looking logo
- a link that asks for your OTP/Login
- a deadline mentioned for next week

Deleting a "private" post or comment means it is permanently gone from the internet. *

- True (Servers wipe it instantly)
- False (Digital permanence is real)

If you post a project to a "free" portfolio site, who usually owns the right to use that data? *

- Only me (Copyright is automatic)
- The Platform (Per the Terms of Service)
- The University

If a "free" app updates its terms to claim ownership of your uploaded projects, what is your safest move?

In your own words, explain the difference between **Digital Participation** and **Digital Literacy**.

3 responses

Digital literacy is the foundational skillset to effectively find, evaluate, create, and communicate using digital tools, while digital participation is actively engaging those skills in online social, civic, or learning interactions

Digital literacy refers to the essential skills and critical thinking needed to find, evaluate, create, and communicate using digital technologies effectively. Digital participation, on the other hand, is the active application of those skills in real-world online interactions, such as engaging in social networks, civic discussions, collaborative projects, or digital communities.

Which of these is the **reddest** flag in an "Urgent Internship" email?
